DESCRIPTION

The ultimate glove for warmth and flexibility, these Maxim flip-top men's mittens offer superior comfort for your hands, even in extremely cold environments, such as cold stores and freezers.

The mitten-style glove keeps all your fingers warm whilst the fingerless under-glove keeps the mitten in place. For a great combination, and for even better warmth and comfort, we suggest that you wear the Maxim men's mittens with the FG440 liner glove.

- Hollowfiber insulation - Traps more air for better warmth and no extra bulk
- Flip Top Design - Mitten style offers warmth and great flexibility
- Open-gauntlet cuff - Easily fits over the cuff on your freezer jacket, minimizing cold draughts
- Canvas construction - Greater flexibility and durability
- Adjustable Straps - No cold draughts and added comfort
- Dual Thickness - Stronger on high wear areas
- CE CERTIFIED - Manufactured to European standards
