Updated On: 24/11/2022

DESCRIPTION

A comfortable filter mask with internal pocket for a removable filter, cushioned nose bridge for the perfect seal and BreathEasy technology for easy breathing.

In the cold with a standard mask, snood or neck warmer these issues occur:

1. Moisture from your mouth ends up circulating around the eye area and freezing on the eyelashes.
2. Normal disposable masks get damp, unusable and uncomfortable very quickly and need to be thrown away.

Considering the above issues, we worked closely with key clients to develop what we believe to be one of the best solutions currently available, welcome the FlexiTog FM6 IceTherm Face mask!

Our initial trials with clients had excellent responses with very good comfort reports. The following key features will be of benefit to your teams;

1. Bacterial filtration efficiency of 98% in [a removable and replaceable filter](#).
2. A snood which you can wear with glasses! A special construction around the nose area to stop moist air circulating around the eyes (also useful for those that wear glasses as it prevents glasses from misting up).
3. A special construction that keeps fabric away from the mouth area thus reducing the amount of moist fabric that touches your face (one of the most regular complaints about the comfort of masks).

Benefits of the IceTherm Filter Mask

- Cushioned Nose-Bridge - For a perfect seal to prevent fogging glasses and uncomfortable eyes
- BreathEasy™ Technology - Easy breathing in the cold

PRODUCT DATA SHEET

The logo for FlexiTog, featuring the brand name in a white, bold, sans-serif font with a registered trademark symbol, set against a red rectangular background.

- Removable Filter - External pocket for a certified removable filter which is certified to EN14683. Order Code: FMF [View here](#)
