DESCRIPTION

SILICONE PALM GRIP

Super sticky silicone grips mean you can even turn pages and pick up paper with your gloves on. The lightweight glove gives excellent grip and dexterity for both order picking and forklift applications.

MAXIMUM DURABILITY

The Silicone grips have been proved to outlast standard fleece gloves by up to four times in busy picking operations.

EXTREME WARMTH

Double layer 280g fleece and Thinsulate synthetic insulation for increased warmth. Elasticated wrist provides protection from draughts when used in combination with a Freezer Jacket.
